ISSUE November 2002

“There was a time when the federal government had to build a railroad to connect Canadians. Now we need their help to build the electronic highway.”

-Mariette Rains

Northern Hospitals Form Digital Imaging Network

truenorthnews.com (November 2002)
Xrays are a 'thing' of the past for nine hospitals across Northeastern Ontario. Digital images and a Picture Archiving and Communication System(PACS) will replace the one-hundred year old technology. The announcement was made Wednesday, Oct. 30, 2002, at Timmins and District Hospital.

First comes Broadband then Comes Business

itbusiness (November 2002)
Canadian businesses are seen internationally as calm, kind and polite--good quality for a date, but not necessarily a business partner. Canada is not seen as a high-tech country, Industry Canada's spectrum officials tells Communications 2002 increased access won't just improve economic opportunities--it will reform our international image...

Power without Wires

Newsfactor (November 2002)
Laptops, pagers, PDA's and cell phones help people remain connected without being tied to their desk. To gain true mobility, there is still one wire that needs to be severed: the power cord...

Outsourcing IT Not an Easy Trend to Follow

Globe and Mail (November 2002)

Outsourcing an e-business's technology should be a straightforward decision. Take an accounting of what certain services cost and see if anyone out there can offer them more cheaply.

The trouble is the technology is changing so rapidly that any basis for making such a decision changes almost day to day...

Courtesy Call: Cellphone Rudeness on the Rise

Toronto(CP) (November 2002)

As the use of mobile phones has increased, the level of civility among users has faded, a poll of Canadian executives suggests. Half of the 100 managers questioned by staffing service Accountemps said cellphone users are less considerate now than three years ago.

Forty per cent said there has been some improvement in mobile manners, while 10 per cent sensed no change...

Speeding Up Broadband

Newsfactor Network (November 2002)

Reaching the outer limits of Internet speed is a daunting challenge for a rapidly evolving medium that already has surpassed velocities once thought unattainable, such as T1 and T3...

Should Small Business Go Mac

Newsfactor (November 2002)

Apple has made it a priority to attract small businesses to the Mac OS platform, reasoning that they will be willing to abandon Windows in favor of a network that is easier to maintain without tremendous IT resources...
