## **Managing Assets Using Wireless Technology**

TIMMINS, ON – January 12, 2006 – Wireless technology is improving rapidly with its uses in our daily lives multiplying exponentially. Have you ever lost something important and wished that there was an easy way to ensure its retrieval? Well your wish may soon become reality, as wireless technology is presently being used to track consumer products, equipment, fleet vehicles and in some cases people. If you'd like to learn more about how wireless and satellite technology can improve your organization's ability to track assets, then plan to attend NEOnet's Tech Break Time technology luncheon on Wednesday, January 24<sup>th</sup>, 2006. **Derek Bain of Beyond Wireless will be discussing how wireless technology can be used to manage assets.**

Admission is free, and lunch is available at the participants' expense. The event will run from 12:00 p.m. until 1:00 p.m. at Siva's Family Restaurant (at the Timmins Square).

For more information on *Tech Break Time* or to register for this month's event, contact Chris McLaughlin at 705.360.1353 ext 1 or [cmclaughlin@neonet.on.ca](mailto:cmclaughlin@neonet.on.ca).

Note: NEOnet is a regional non-profit technology development organization working to improve telecommunications services and ICT adoption in Northeastern Ontario.
