Phone: 705-360-1353 x1**

Mobile Devices an Emerging Threat

Timmins, ON – March 22, 2007 – Mobile devices – cellular phones, MP3 Players, iPods, and Blackberrys – are increasingly utilized by the average individual not only the business person who is trying to stay connected. The versatility and ease of use of mobile devices has lead marketing companies to suggest that you can leave your laptops, projectors and cellular phones at home the next time you are on a business trip and to simply bring your PDA (Personal Digital Assistant). Mobile devices are keeping us connect but they could also pose a security threat for your operation. Gerard Bruneau of NorthernTel will investigate how mobile devices, such as PDAs, are a security risk for information stored on office computers as well as network servers and databases at this month's Tech Break Time luncheon – April 10th 2007.

Admission is free, and lunch is available at the participants' expense. The event will run from 12:00 p.m. until 1:00 p.m. at Siva's Family Restaurant (Timmins Square).

For more information on *Tech Break Time* or to register for this month's event, contact Chris McLaughlin at 705.360.1353 ext 1 or cmclaughlin@neonet.on.ca.

Note: NEOnet is a regional non-profit technology development organization working to improve telecommunications services and ICT adoption in Northeastern Ontario.
