Phone: 705-360-1353 x1

Open Source Operating Systems: Viable Alternative?

Timmins, ON – April 20, 2007 – There are a number of operating system platforms that can be installed on your personal computer, however the brand of computer often dictates which one, for example Mac's OS X (Tiger), Open Source Software, and Microsoft's line of operating systems: Windows 2000, XP and now Vista for the PC. Windows Vista is the latest in Microsoft's line of operating systems to hit the retail market. NEOnet's three part presentation series on operating systems continues this month, with an investigation into what this new operating system can offer both the home and business user. Marc Durocher of NorthernTel will present Part II of the series, providing some answers to your questions concerning the new Windows operating system at this month's Tech Break Time luncheon – April 25th 2007.

Admission is free, and lunch is available at the participants' expense. The event will run from 12:00 p.m. until 1:00 p.m. at Siva's Family Restaurant (Timmins Square).

For more information on *Tech Break Time* or to register for this month's event, contact Chris McLaughlin at 705.360.1353 ext 1 or cmclaughlin@neonet.on.ca.

Note: NEOnet is a regional non-profit technology development organization working to improve telecommunications services and ICT adoption in Northeastern Ontario.
