Phone: 705-360-1353 x1

Hi I'm a Mac, What are you?

Timmins, ON – May 17, 2007 – There are a number of operating system platforms that can be installed on your personal computer, however the brand of computer often dictates which one, for example Mac's OS X (Tiger), Open Source Software, and Microsoft's line of operating systems: Windows 2000, XP and now Vista for the PC. The final presentation in NEOnet's three part series on operating systems will investigate Mac's OS X (Tiger). Michael Byrnes – 'The Loose Cannon' – will discuss both the advantages and disadvantages of making the move to a Mac at home or the office. To learn more about Mac's OS X (Tiger) operating system plan to attend this month's Tech Break Time luncheon – May 22, 2007.

Admission is free, and lunch is available at the participants' expense. The event will run from 12:00 p.m. until 1:00 p.m. at Siva's Family Restaurant (Timmins Square).

For more information on *Tech Break Time* or to register for this month's event, contact Chris McLaughlin at 705.360.1353 ext 1 or cmclaughlin@neonet.on.ca.

Note: NEOnet is a regional non-profit technology development organization working to improve telecommunications services and ICT adoption in Northeastern Ontario.
