Videophones

Timmins, ON – January 22, 2008 – Ever wonder what the person on the other end of the phone looks like? Whether they are really paying attention to what you are saying? Telecommunication technology has come a long way from rotary phones to dial tone, to cellular, and now videophones. Improvements in telecommunications infrastructure and advancements in Voice Over Internet Protocol technology – VOIP – have set the stage for affordable videophone service. If you are interested in learning more about videophone technology and how it could help your business or how it could benefit you at home, plan on attending NEOnet's January Tech Break Time luncheon. Thomas Kim an Independent Representative of ACN Inc. will provide insight into the technology on Tuesday January 22, 2008.

Admission is free, and lunch is available at the participants' expense. The event will run from 12:00 p.m. until 1:00 p.m. at Siva's Family Restaurant (Timmins Square).

For more information on *Tech Break Time* or to register for this month's event, contact Chris McLaughlin at 705.360.1353 ext 1 or cmclaughlin@neonet.on.ca.

Note: NEOnet is a regional non-profit technology development organization working to improve telecommunications services and ICT adoption in Northeastern Ontario.
